-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 4,776,495 to *Vignot* (*Vignot*).

Regarding claim 1, *Vignot* discloses a fluid dispenser comprising a fluid reservoir (1) and a dispenser head (6) mounted on the reservoir, said head defining a dispensing chamber (area between 22 and 9) communicating with the reservoir via an inlet valve (22) and communicating with the outside at a dispensing orifice (10) via an outlet valve (9 with 17), said dispenser being characterized in that the chamber is defined by at least one elastically deformable actuating wall (6) that is depressed in order to generate a pressure inside the chamber that is high enough to close the inlet valve and to open the outlet valve (col. 3, ll. 4-13), wherein the outlet valve forms the dispensing orifice from which the dispensed fluid can be collected (col. 2, ll. 24-30), wherein the outlet valve is formed by at least a portion of the at least one elastically deformable actuating wall (12, col. 2, ll. 24-30) contacting a seat (17) that has a fixed distance from the fluid reservoir (Figures 1 and 2).

Regarding claim 2, *Vignot* shows the actuating wall is formed by a sleeve (6) that is at least locally flexible and that internally defines a portion of the dispensing chamber (Figure 2).

Regarding claim 3, *Vignot* shows the head has a top (9) opposite from the reservoir (Figure 2), the dispensing orifice being place substantially at the top of the head (Figure 2).

Regarding claim 5, *Vignot* shows the sleeve has a stationary end (7) forming anchor means and an opposite end (9) forming a flexible lip (12) in leaktight abutment against the seat, the lip and seat together forming the outlet valve (col. 2, ll. 48-50).

Regarding claim 6, *Vignot* shows the head has a body (8) forming a ring (20) serving to cooperate with the reservoir (Figure 2), the body forming an inlet valve seat (lips 22 are both seats for one another).

Allowable Subject Matter

Claims 7-20 are allowed. Examiner acknowledges that claims 1-3 and 5-6 were previously indicated as allowed. However, when doing a cursory search of the art before processing the allowance examiner found the *Vignot* reference. As such, this Office Action has been made Non-Final.
